NodeJS, Express

Software Testing

Managing DigitalOcean

Droplets and AWS

Static Site Generation

Basic Video Editing

TOOLS

Notion

JIRA and Git

Final Cut Pro

Microsoft Suite

Selenium

Postman

PERSONAL SUMMERY

I'm a versatile and professional person looking to work in a team and collaborate with smart and experienced individuals. I am able to perform well under pressure and get things done right. As during my time in university, I have worked alone and with a team on various interesting projects, now I am very excited to work with a team of great individuals. I keep up with tech news, always eager to learn and know about new tools and tinker with them. I also like solving problems and taking on tough challenges.

EDUCATION

BSc in Computer Science (Graduating in April 2021)
BRAC University

THESIS

Deepfake detection in videos detecting face wrapping using CNNs
Published in BRAC University

PROJECTS

- python-scripts: A collection of small python projects including COVID data scraper, OCR screenshots to smart google search for quiz shows and automations etc.
- edushare: A project where online tutor can teach students, stream classes, assign tests and assignments. Made using Bootstrap, MySQL, HTML, CSS and JS.
- mac-setup: A static site containing a boilerplate for setting up a development machine on a new macOS installation. Made using Markdown and Docsify. Automated using Bash.
- pizzahouse: A site where you can order pizza and manage the orders. Made using Laravel and Vue.

More projects with showcase can be found on my website.
